Hello

**RE: LISTING OF FINANCIALS RECORDS IN WALKER GLOBAL INDUSTRIES, LLC
CATALOGS**

Derecognition is the removal of a previously recognized financial asset or financial liability from an entity's balance sheet. A financial asset should be derecognized if either the entity's contractual rights to the asset's cash flows have expired or the asset has been transferred to a third party (along with the risks and rewards of ownership). If the risks and rewards of ownership have not passed to the buyer, then the selling entity must still recognize the entire financial asset and treat any consideration received as a liability unless transferred to another entity, (SPV) special purpose vehicle for one. A company may form the SPV as a **limited partnership, a trust, a corporation, or a limited liability corporation**, among other options. It may be designed for independent ownership, management, and funding. In any case, SPVs help companies securitize assets, create joint ventures, isolate corporate assets, or perform other financial transactions.
